msgtpainbigjoe14Valve is running a fake warez version of Half-Life 2. If you download it you'll never be able to play it even if you bought it.

Okay, sure...

Unless of course you know how to backup your registry before install.. or at worst, reinstall your OS..

Too bad that won't do shit, since you have to log into Steam to run the game.

Also, Doitle, what you said about many people sharing has a flaw. You can share it, but you can't play it more than once at a time with one account. I don't get why people think you can avoid logging onto Steam or that Single Player does not require Steam. You DO have to log in for both Multiplayer and Single Player... Get it right damnit.
