Subject: Super high ping
Posted by t1000n1 on Tue, 30 Nov 2004 19:07:20 GMT

I know this isn't a cp1 or even a renegade post, but. I am house watching for a friend and he has Directway Direct PC sattalite connection wich is 10Mbps for speed. The question is its super fast surfing, but my ping for renegade is 1800. Since cp1 will have lots of responds I just thought that someone would know how (and if) I can fix this. I even went to they're website and found no answer. It also has nothing to do with the weather, alignment, firewalls because downloading and surfing are superfast with no latncey or slowdowns. Please help I want to play Renegade on a connection other thant 56k. Wich by the way i have a good ping for dial up on wich is usually 226 -300.
