Alkaline

dragonade just adds retarded stuff like weather, animations and a bunch of junk that just eats up fps... sure the look nice but I rather play with faster frame rates

You may call it retarded, but I find it enjoyable. And I don't have any FPS problems, I keep my system well calibrated and uptodate with the best stuff.

But either way that 'weather; and 'animations' are alot more enjoyable then a bunch of useless sounds and a silly font.
