oblivion165i didnt say a jeep could handle it, but its more equiped and designed to. that thing would get stuck in a pot hole.

No It wouldn't. If it ran over a pot hole it wouldn't even really effect the vehicle.

If a Jeep fell in a muddy ditch , it's not getting out. It's the same with this Steath Tank. You said if the vehicle fell in a ditch it would be pointless as if you were saying it was an illogical design compared to other vehicles.
