Before I had a P3 500 with int Rage pro, 15gb 5400 UMDA 100 drvie and it take 1min to load.

Now I have Athlon64 3200, Rad 92, 80gb 7200 SATA and loading only takes 1 sec or less.

So you need faster CPU and GPU to speed up loading.

And I regret the error, RAID appears to take longer for Renegade
