Subject: error 17 at installer (language.exe) + Renegade crashes!
Posted by WNxCABAL on Sat, 04 Dec 2004 01:23:32 GMT

Hey, Just installed the Core Patch 1, but with a problem.
I downloaded it, extracted it and finally ran it.
The Installation began, the maps such as city, walls, etc and always2 was copied, but, then appeared the language.exe command prompt window.
After doing all of its crap'o'latta it gets round to renaming scriptsx.dll to scripts.dll, then it appears with an error 17?
So I thought, okay, lets see if renegade still works, but now when ever I click Westwood Online in Multiplayer, it just crashes to desktop.

Here is a screenshot below, Any Help?
Cheers,

Andy
