Hmmmmmm.... really. I always thought the majority of the people that play online games on here has BroadBand. Seriously, everytime I see a poll of "What type of connection you have" people race to the post to tell what connection they have. And majority online gamers have atleast a ADSL/Cable/T1 line etc. connection. I know there are some people are out there that has 56K. I know that there are some people that live in areas where they online can get 56K cause BroadBand is not available. Just saying. You can't please everybody. Thats how life goes.

And I know I'm not really suffering. Its just one of those expressions you used from time to time.
