Ya Alkaline, I did that shortly after this flooding started because I couldn't handle it spamming so much, especially that each one of those messages is accompied with it's own iteration of an Admin Msg pop-up box ingame.

My suggestion would be to be able to make that an option in the Renguard file to choose what form of message you want, i.e. page, msg, amsg

Would that be possible?

Also FlyingFox it's a great out of game tool that allows you to easily moderate the server by seeing what team has what in case a vehicle was stolen, etc.
