Frankly if it does not have the word "Renegade" anywhere in it, I don't give a damn. I was never really into the RA games, but maybe that is because i never really played 'em. So if EA is going to kill their employees on the inside at least make it a "Renegade" look-a-like.

.....or better

edit: Yes, it might seem arrogant,jackassish but it's what i feel, and i need to express those feelings. And I don't want to live with that. :rolleyes:
