Hello Everyone,

I just installed Renegade, and when I tried to go online it said there is a new version of renegade and asked me to download it. If I say no it brings me back, if I say Download, it downloads untill everything is done, but then it says:

Estimated time left: 1 sec (18.7 MB of 18.7 MB Copied)

and I can only click [abort]

so what can I do .... :S

(Btw i'm new here)
