The only problem with what you've been saying is: You have FAILED to deliver a map which satisfactorily changed the units as outlined.

You bitch about the Havoc over and over and over... EVERYONE has said, if you provide a unit that can counter across the map units efficiently, and make SEEKING missiles from everything that fires a rocket.. NO ONE will care if you change the way Havoc/Sakura function..

Problem is.. you can't seem to make the missiles seek.. so we don't agree to run your maps where all you do is make your Orca own everything in the game..
