macNo, on this one. Already discussed it with jonwil

While its probably technically possible to fix it, it creates an imbalance between CP and non-cp players on the same servers - ie CP players have a reloaded pistol on startup, and the others won't.

Understood, but is there not some way we can make it so EVERYONE will get the patches? Kinda like how it was when Renegade 1st came out. That would solve many problems based on advantages of having CP1, and not.
