Obviously, if you used a virus protector and scanned the *.zip/rar file for viruses, you would know. Besides, using a *.zip/rar file actually decreases the file size by 500kb-2mb depending on the file. I've just viewed the movie, they are no viruses what so ever, just a plain *.wmv file. :rolleyes:

But, on topic; the movie was pretty good, you got pretty good reflexes and accuracy.
