---

sUpRaDaand i compressed it..

its like 3mbps bitrate with a .wmv/mp3 codec... and if i didnt compressed that it was like 300mb..

You lack professional knowledge.

3mbps bitrate? That is WAY too high, even for short movie like that. Try under 1mbps (like 768kbps) and the size will be SO MUCH SMALLER and you won't see so much of a difference.
