Somehow I'm glad that EA isn't making a Tiberian game. They'd screw it up anyway. The Red Alert 'series' (RA2 and YR, not including the first RA) on the other hand, is already very cheesy and comical. I won't mind another entry to it.  
I just hope they won't try to link RA2/YR to TD.

(Although it'd be kind of interesting to see all that Renegade 2 material in RA3)
