That's actually a good summary.

2v2: start by getting 1 apache 1 sakura. When you can afford it get a technician for the apache and a light tank for the Sakura.

3v3: 1 apache/tech, 1 light/sakura or APC/sakura, 1 light/technician

4v4: 1 apache/tech, 1 light/sakura, 1 light/technician, 1 light/raveshaw
