I have had renegade for along time now and the cds are getting a little skuffed up. I was wondering if there was a way to make back up copys or have a cd hack soft ware so i can decrease the use of the cds. Or is therer a way that i can get a new set of disk sent to me. I can hardly play ren sometimes im at the mercy of the disk working when they want and i really do not want to buy the disk again because i already bought them. i have tried to contact westwood.com and EA.com and i did not get a replay so i was wondering what i could do to solve this problem.
ANY SUGGESTIONS
