The FDS (Free Dedicated Server) is a stand-alone program, completely independant from your Renegade game.. it does nothing but sit there and run the server side portion of the game code; you can not play on it.

It is used by people who host "dedicated" renegade servers, on "dedicated" server hardware..

There are NO admin programs that you can use, if you host a game from within your renegade game client.. It doesn't produce a log file, and there is nothing that an admin program can act off of..

If you don't understand all this.. then just give it up, there is nothing anyone can do to help you get it running.
