Crimsonbuxton4z310spreegemInternet Exploder

I prefer internet exploiter, my IE is also fucked up whenever i get a 404 it goes to a nonexistent C:\searchpage anyone else have this trouble? I only really use it on the lottery website because it won't let me use firefox.

You need to download F-Prot antivirus to clean the spyware off your system. It has to be done in DOS mode with a boot disk so it will be quite an ordeal. Blazer and I went through HELL with that thing but now we run F-Prot real-time protector and now spyware can't get on here.

why does spyware infect IE? :rolleyes:

who uses IE nowadays anyway? :rolleyes:
