IngrownlipPulmonary Embolism, It's basically a heart attack.

And yes that was very sad news. I was joking with one of my friends about how red he looked.. Like he'd been out in the desert for a couple weeks!

Very surprising... I personally think those reporters are brave. I'd want a gun or something so I could at least "throw rocks" back!

Ummm no it isn't.

Read what I have posted. I got it right from the American Journal of Medicine. Also I am a Firefighter/Paramedic and have had training cardio-vascular and pulmonary conditions and treatments. If anything a heart attack can be a RESULT of a PE. But a PE is NOT a heart attack. :rolleyes:
