... ok My Ren was all fine until one day i saw in a MOTD "Download NEW Core patch @blah blah blah.com" so i got it n all but the wen i played ren it slowed up my fps ALOT! is there a way i can delete the core patch while still having rengaard and without re-installing?

Also, I saw a post about putting music for the menu thing. where can i get new songs that will work for that.... for free?
