3gb is really nothing :S it kinda depends on what speed the internet will be your getting.
If you get 3Gb with a 128K/64k connection, i guess you are less likely to exceed that limit than when your getting a 10m/2m..

My bwusage for the last few weeks, did a clean install of winxp recently so ..

"\$6 per month for 250 Gig, Unlimited BW"

Which is it? 250Gb or Unlimited (FUP) ?
