EnglandNo such thing as unlimited bandwidth, its unmetered!

My website, which is a mere 3kb uses about 50 megs a month on the index page, weird - <http://www.killersmurfs.net> - popular domain it would seem

Then again i used about 3gigs a month in random linking and files - but i dont pay, so im not bothered.

Also i would pay monthly, not yearly, if you dont like the service, your kinda up shit's creek!

You have no Idea how many times Ive been there without realizing it...
