BlazerNotice how it's always "a friend of mine" who can bypass renguard, or "some guy"...never any names, or specific servers, games, dates, or anything even close to evidence. Its rumor spreaders like these that are more pathetic than the cheaters themselves.

Also notice that anytime someone is caught cheating, its always "my brother was on my computer and used cheats". Grow some balls and stop lying n00bs, you will get farther in life. while that may be true for most people who say they've seen renguard bypassed, it isn't always true...

cough cough ghost911x cough cough...
