GeTSm0keDsince this is the on-goin graphix thread.. i have a problem.. lol

i has to do with the grays.. they look purple when im in PS..
but not image ready
Tried re-installin .. didnt help..

any ideas?

It's OK man - You just got a little pesticide in yur weed dood - Burn sum clean green & then it'll
look grey again man...
Actually - don't adjust your settings - the purple - it's just your gayness coming thru - let it come
out! J/K man! May seem obvious, but can you simply restore default settings in your editing
software?
