j_ball430Xtrm2MattMy server uses around 5GB a day. But that's including game servers, etc. My site uses around 15GB a month alone.
That only averages about 150GB a month. Our dedi has 1000GB. Oh, and I think you guys can all laugh at this: DarkDemin was insisting that a CS:S server would use MORE than 1000GB in a month.

Traffic Period: 0.83 Months
Traffic allowed per month: 1500.00 GBs
Traffic allowed for this period: 1500.00 GBs
Traffic used per month (avg): 260.23 GBs
Traffic used this period: 215.99 GBs

Don't think so

That's with 4 CS 1.6 servers (4 x 24), a CSSource server (1 x 40) and then IRC, Websites etc etc..

Still leaves me with ~1.3TB to toy with
