NodServntFor #1 Mr. Nod3145 what you did made you NO better then ANY of the cheaters' out there.

#2 You have cheated for a while, because of the way you was doing it was almost pro like.

#3 I hope that they post your Screen Name on here just for you cheating ON AN OPEN SERVER SO WE KNOW WHO YOU ARE!

Ok, Now that I have put that in there... I would think that Mr. Aircraft Killer as well as the others' can agree with what I said.

C&C
Ken

No. You're wrong.

1. The only cheat other than this one I tested was Final Renegade many months ago in a designated server. I tested this one to see how cheating has evolved since then into more cunning techniques.

2. I have not cheated for a while, I was playing almost "pro-like" because I have been playing Renegade since it was released. It's not hard to deduce what manuevers a stealthy cheater would employ (as demonstrated) onced you've figured out what types of cheats they had available to them in the first place. In case you haven't figured it out already, there's not much skill involved in cheating, so I don't get how you can come up with "pro-like" cheaters to begin with.

3. It's somewhat necessary to demonstrate cheating on an open server to get the point across. Oh yeah, it only lasted about 3 and a half minutes, so don't panic. Like I said in the original post, I did test out the cheat's abilities in my own private server prior to filming the video... but filming the video in my own private server would have much less of an impact on viewers of the video.
