<http://www.cncnz.com>

There always good for utilites...

Heres the direct link to Renegade EX...

[http://www.cncnz.com/file.cgi?http://downloads.cncnz.com/renegade/utills/rex\\_101\\_release\\_build74.zip](http://www.cncnz.com/file.cgi?http://downloads.cncnz.com/renegade/utills/rex_101_release_build74.zip)

I prefer the XCC Mixer:

<http://www.dlcentral.com/?start=126>

You have to wait a while when its launched so it can scan ur PC it may stop responding while doing this but don't worry it will start again.
