1985 Chevrolet S-10 Blazer
2.8L Carbed V6
700R4 tranny
3.73 Locking LSD in the rear

The pic is from about a year ago.

I'm in the process of completing a 2" suspension lift.

End of March a 4.3L TBI V6 or a 5.7L TBI V8 (depends on whats available at the time) will be going in, providing my boss decides to pay me on time for once.

One nice thing about the underpowered engine my truck has is; I've never gotten a speeding ticket. There are a lot more bad things about it though.
