Pic/railgun are instant hitters and have a high range. You can kill most people easily.

Now if you claim to be "skilled" at the game, you claim to be good with any weapon or vehicle. skill is when you judge a grenade across half the map to hit a moving soldier in the head. skill is judging an artillery shell to hit bang on a distant soldier. skill is being able to take out two superior vehicles with a weaker one. but skill sure isn't bodyshooting soldiers the entire game
