=[DT=gbull=[L]=]this story reminds me of a good friend of mine. His name is STORM but it used to be ZeeLd and [TwA]STORM. He gets 60+ a game and only like 2 deaths and everyone accuses him. Its a crying shame when people dont see true skill isnt it ADM

yea skill.. the reason why he does not die is becuase nobody can hit the flickering shit  
i gave up playing on that server becuase of him

this whole flickering shit pisses me off.. you see some players.. they dont flicker at all..they jump left to right blah not flickering one bit  
then you come across this "good" sniper and his boucing off the fucking walls
