Hm.. i remember brenbot having problems with "Spaces" in directory names.

This is not the case or is it?

eg: where is the fds on the drive?

example:

Should work:

C:\Westwood\RenegadeFDS\

C:\RenFDS\

D:\FDS\

etc.etc.

Will Not Work:

C:\Program Files\Westwood\RenegadeFDS\

C:\Server Files\Westwood\RenegadeFDS\

E:\Programs And Stuff\Westwood\RenegadeFDS\
