yeah but I only get software to make tabs using text, eg.

```
 S|x---------------|x---------------|x---------------|x---------------||
 B|--------x-------|----------x-----|-----------x----|----------------||
 L|----------------|----------------|----------------|----------------||
 C|----------------|----------------|----------------|----------------||
 F|----------------|----------------|----------------|----------------||
 H|--------x-x-x-x-x-x-x-x-x-x-x-x-x|x-x-x-x-x-x-x-x-x-x-x----x-x-x-x-x-||
 O|----------------|----------------|----------------|----------------||
LH|----------------|----------------|----------------|---x-x----------||
 R|----------------|----------------|----------------|----------------||
```

Which is pretty much useless to me because that ^^^ is not how drum music is presented.

I need software that will actually set the correct symbols on actual lines, not dashes etc.

I basically mean the end result should be like my pic in the first post.
