Packets is the same as data ? (i'm not into the tech stuf as you can read)

I have also the map error thing, i believe it's called "corrupted map" or something. Same goes for the always.dbs. Read about it on the forum so i guess it's "normal".

Now i think i could be best reinstall Renegade itself, or could it have something to do with my conection ?

(Because it's not rg, maybe wrong section now. But now that we are here.....)
