glyde51 Firefox is a browser.
Mozilla is a different browser.

What are you talking about?

Mozillia Firefox is an internet browser , as Internet explorer is. Firefox is much better than internet explorer though.

Mozilla is the developer. They developed Firefox , Thunderbird and Mozilla Suite. They also have made other small programs.

Firefox is a program.
Mozillia is a software developer.
Glyde is a dumb person.

I hope that clears things up
