nice job guys!

I was wondering in the next patch if you guys can fix the "start" bug(thats what I heard its called) This has happened to me and a few other people I talked to on WOL. Here is what happens. I want to join a server and say its a 8 player server and there is 4/8 players in the games so I click on the server to join it and it is totally empty it shows no players in the game and the start button is not highlighted so I cant join the server. Have you ever heard of this bug?
