Renardin, I thought you were going to take criticism better. Now, I know you didn't even consider this guy's ideas.

[AFStealth])If you ask me it sucks... and if you wanna know why it sucks I will tell you.

1) The model sucks (Nightcrawler I've seen you do better than that) He could've added more detail to the actual model (That model wouldn't feel like a Heavy Sniper if I could pick it up). =/

2) The texture is too repetitive on most parts.

3) The texture is also too Dark.

Renardin1) sorry for the model, I like it. More details ? It has enough, it's not a computer but a gun.

2) Should I had some wood, sand, silk and concrete parts ? It's black metal....

3) It's black, so it's normal if its dark.
