Aircraftkiller You're the same guy who doesn't trust RG either, hence why you banned people for cheating while still using it... The argument you're making doesn't hold water. I've said my piece, out of this thread.

You're wrong, and just use the same story to help make yourself feel better.. You're the only person I've ever banned while running renguard, and it was because you admitted cheating on servers like BC to "get back at them" and because it "was funny".. The ban had nothing to do with what you were doing in the server at the time.. If I wanted my argument to hold water, I would have written it on a bucket, not on these forums.

Run along now..
