I found some of my old image URL's around the n00bstory forums. It's really nice to look bad at old things. I found this:
<http://www.n00bstories.com/image.view.php?id=1092347042>

My first map in gmax for renegade a few years ago. It's cool to see how I came from that to what I can do now.

I hope crimson does something like make a huge gallery page of lost images.
