Back Again

oke I Got A WARPING SERVER

Please Help me it pritty sux

Every one who plays on [lwd]Server Knows that it isn't laggy

every one got a ping under the 200

but it's fucked up warping

it is something with ssaow or brenbot it reinstall fds and but Net Update rate to 30 it will play like heaven on our server but when i install ssaow it pritty SUX
