Then get them to speak coherently and explain their problems. See, if you would actually take the time to learn and ask about your problems, they can usually be resolved quickly. But, NO, you geniuses have to go in and fuck it up further all the while blaming it on the programmers of the program. Grow up, you ignorant fucks.

Edit: Geniuses, I NEVER said I could create it or ever claimed that I was smarter than the programmers. Also, genius, stop pulling arguments out of your ass. "Coherently" is a word.
