ThunderChickenDoitle,

I did the Disable Physical Collision, works well. The orca hovers above the AirStrip until I get in. But whenever I hop out of the orca, it falls through the ground lol. I'll use it if I can't find any alternatives

Thanks.

Yes but that wont disable projectile (although then again, who cares? We can shoot through ground! eeeeeevvvviiiiiiiii). To set health and all to -1 you have to dl the mod tools and use Level Edit however the server will become a client side thing (ie, people need to dl the mod) or there is a way you can make it server-side but everyone will get the zero bug so kinda pointless.

Also, this is a very clever way to moderate a server. Might want to talk to Dante about adding such a thing in BR (ie, being able to switch to a custom c130 drop script at an Admin's will, allowing better moderation).
