I guess Petroglyph just doesn't have what it takes to impress. These are merely a few 1st steps. If comparing art is your bag... then read some articles about Age of Empires III... they had a programmer dedicated to water alone... plus they have been working on the bloody thing for a few years... Petro has had about 1 year tops all the while the engine is always changing. Can't please everyone. Oh ya... 3 artist for most of that period.

Anyone heard that Primus song... "They Call Me Mr. Knowitall?"

Ballucks
