yo mac this latest cp is well kewl, we have the latest version running on the DT AOW marathon server on Euro, its kewl as hell, really nice work.

Also i love the fact that it is so editable to server owner preference, that also kicks ass, we got ours spawning every 20 seconds, its crazy

BTW i also noticed that when getting the beacon crate you get a load garble paged to you, but that is a minor thing really i guess...

would be nice to see this stuff ported to ctf, sniper and so forth
