If you do not want crates, put in an older SSAOW version, like the one from SSCP1 1.2. I will fix the issues and others in the next version

If the vehicle drop off is not correct, check what map it is, and look in server2.ini for coordinates. You can either delete them (then there will be no vehicle dropoff)

However, all vehicle spawn coordinates for the supplied maps in server2.ini should be okay.
