yeah, don't know how those noobs did that... They must really sux at computers... :rolleyes:

Don't try to install winamp or other program on your computer, you may crash the whole internet...
-> sarcasm

I installed the old reborn many times (the one our ftp server, and I had not a single problem on my comp).

If you download it from another place, then we aren't responsible if it's corrupted by a virus or something else... Try to think sometimes... (I am serious, it won't hurt you, just try!) Thank you.
