"codemancqi dont even think they tested that tutorial to see if it worked

Thats the point you thought

I'm 99,9% sure GenHavoc has tested this, and like we discussed on my board, you used a complete different script to get a complete different result, so I assume you setted up something wrong, but if you can wait 1 or 2 days I'll try it out myself, but I have used script zones successfull before, so I see no reason why it should NOT work...
