EA-DamageEverythingThats not right at all, much of those Servers in WOL are WOLspy Servers and you can connect with them through GSA or RenIP or ASE. Partially you´re right, ASE maintains the same function as RenIP, but if I wanna play on a non-WOLspy Server and WOL IS DOWN LIKE NOW (02-09-2005, 23:20 European time), I must get IP & Port and have to use RenIP.

Anyways, I actually use ASE and hope WOL will be right back up soon....

Tell me something.. a server using WOLspy, what mode is it using to connect in the server.ini? WOL or GAMESPY mode?
