Yes I have this and it works without a modchip so no violating your warranty.

The only problem with it is that if your cd swap magic is somewhat broken then you can't used AR cheats on it.

To me it's a messege, clearly saying: STOP CHEATING lmao.

Actually I'm not 100% sure if you can't use cheats with this because the cd's have been updated since the last time I bought them from the same website
