C130 Drop mod works for everyone on a server, so its no real cheat.

ghostSWT, You hit the nail on the head!

RG blocks types of cheats not individual cheats. If there is a *.w3d file that shouldn't be in the data folder, you can't play. If there is something out of place with Always.dat, objects.ddb or any sort of trainer, it can all be detected. The only way you will be able to cheat is if you find some kind of bug or find a completely new way to cheat. Nobody is that desparate.
